The true left end of clone C01G6 is at 1 in this sequence. The true right end of clone C01G6 is at 42193 in this sequence. The true left end of clone D2013 is at 43257 in this sequence. The start of this sequence (1..104) overlaps with the end of sequence AL021147. The end of this sequence (43257..43410) overlaps with the start of sequence Z47808.

For a graphical representation of this sequence and its analysis see:- <http://wormbase.sanger.ac.uk/perl/ace/elegans/seq/sequence?name=C01G6>

IMPORTANT: This sequence is NOT necessarily the entire insert of the specified clone. It may be shorter because we only sequence overlapping sections once, or longer because we arrange for a small overlap between neighbouring submissions.
